Engineering graduate specializing in Artificial Intelligence and Machine Learning with strong foundations in Java, SQL, HTML, CSS, and Data Structures & Algorithms. Experienced in developing responsive web applications and machine learning projects through internships and academic projects. Passionate about software development, problem solving, and building scalable applications. Seeking an entry-level Software Engineer opportunity to contribute technical and analytical skills in a growth-oriented organization.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Machine Learning 2022 – 2026
Sri Sairam College of Engineering, Anekal
CGPA: 8.74

PCM in Computer Science 2021 – 2022
Vishwa Chethana PU College, Anekal
Percentage: 88

Schooling 2019 – 2020
Saraswathi Vidya Mandira, Anekal
10th Percentage: 89.92

SKILL SUMMARY

TECHNICAL SKILLS

Languages: Java, SQL, Python
Web Technologies: HTML, CSS, JavaScript
Core Concepts: Data Structures & Algorithms, OOPs
Tools & Platforms: GitHub, VS Code, Power BI, Excel

SOFT SKILLS

• Communication • Problem Solving • Adaptability • Team Collaboration

INTERNSHIPS

Edutainer 02/2026 – 05/2026
Junior Software Developer Intern (Entry Level)
Worked on frontend web application development using React.js, HTML, CSS, JavaScript, and Bootstrap.
Developed responsive UI components and improved user experience across multiple web pages.
Collaborated in debugging, testing, and implementing application features in a team environment.
Gained hands-on experience in component-based development and software development workflows.

Elevate Labs 12/2025 – 01/2026
Performed data cleaning, analysis, and visualization using Python, SQL, Excel, and Power BI.
Created dashboards and analytical reports to support business insights and decision-making.
Worked with structured datasets and improved understanding of real-world data processing workflows.

PROJECTS

UniBank Secure React Banking Application 02/2026 – 05/2026
Developed a responsive banking dashboard using React.js with features including login authentication, transaction management, payment modules, analytics visualization, and security monitoring. Implemented reusable React components and responsive UI design using modern frontend technologies.

Speech Emotion Detection System 11/2025
Built a Speech Emotion Detection System using CNN-LSTM models to classify human emotions from voice data. Extracted MFCC features and improved model accuracy through feature tuning and experimentation.

A Wearable Technology for Elderly Care 02/2025 – 01/2026
Developed an IoT-Based Wearable System for gesture-based communication and real-time health monitoring of elderly and paralyzed individuals. Applied ML techniques to generate automated emergency alerts.

CERTIFICATIONS

- SQL for Data Science – Coursera
- Introduction to Internet of Things – NPTEL

PUBLICATIONS

- Presented a paper on “Nano Structured Coatings for Soil Erosion” at a State-Level Conference.
- Presented a paper on “A Wearable Technology for Paralyzed Patients” at an International Conference.
